Projects

Sumant Tour & Travels

Mar-2024/Present

- **Project Overview:** Developed a comprehensive tour and travel website from scratch, catering to the needs of travelers seeking seamless booking experiences and personalized travel itineraries.
- Technical Skills: Utilized a combination of frontend technologies including HTML, CSS, and JavaScript, alongside tools such as Visual Studio Code and Git, to architect and develop a dynamic and responsive website interface for a tour and travel website.
- Customer Relationship Management (CRM): Integrated the query form data with a CRM system to efficiently manage customer interactions, track inquiries, and nurture leads. This ensures timely responses and personalized communication with prospective travelers, enhancing customer satisfaction and loyalty.
- Social Media Integration: Incorporated social media sharing functionalities to enable users to easily share travel experiences, tour packages, and destination recommendations with their social networks, enhancing brand exposure and engagement.
- Testing and Quality Assurance: Conducted comprehensive testing across various browsers, devices, and screen resolutions to ensure cross-browser compatibility, functionality, and performance optimization.
